OVERVIEW

Lantech TWAP-5004 series is a next generation EN50155 multi-function VPN router w/ 1 x 802.3ac Wi-Fi + 4 Gigabit X-coded Ethernet Switch + 2WAN/2LAN ports + 2 serial ports that supports advanced function of VPN, Load-balancing**(Premium pack), TWCC**, Protocol gateway**, Storage**, Wi-Fi roaming**, and Air teaming** for on-board / onboard-to-ground applications.. The dual core CPU with 1.6GHz + 256M flash enables the router to multi-task smoothly.

*Optional TWCC** (Train Wireless Carriage Coupling) for auto coupling*

TWAP-5004 series supports optional TWCC** (Train Wireless Carriage Coupling) that enables auto wireless coupling to reconnect APs.

IEEE 802.11ac one band radio up to 2.6Gbps bandwidth

With IEEE 802.11ac capability, TWAP-5004 can operate either 5GHz or 2.4GHz bands, offering the maximum speed of 2.6Gbps bandwidth (1.3Gbps per 802.11ac module) it is also compatible with 802.11b/g/n that can work with 2.4GHz for longer range transmission.

MIMO technology with 3T3R and standard SMA / optional QMA type connectors

Lantech TWAP-5004 series adapts MIMO technology with smart antenna transmission and reception for 3T3R. With six external detachable antenna SMA/QMA** connectors and optional antennas, TWAP-5004can have better Wi-Fi coverage. It can support unlimited concurrent users for WI-FI hotspot application.

Air-teaming** for wireless high-sustainability and aggregated bandwidth

The innovative Air-teaming** can combines multiple wireless links to achieve both high-sustainability and aggregated bandwidth. High sustainability can keep the network traffic alive even one link is down or severely interfered. Aggregated bandwidth can bind two link channels to provide the maximum throughput.

Optional 802.11r fast roaming < 50ms**

TWAP-5004 support fast roaming < 50ms** in coordination with Lantech Wireless Controller to allow encryption keys to be stored on all of the APs in a network.
Client mode supports PMK** Caching and pre-authentication (move to roaming section).

Wireless WMM QoS

TWAP-5004 supports 802.11e standard which defines a set of Quality of Service for wireless LAN applications as well as WMM (WI-FI multimedia)

Advanced security & 16 SSIDs

The security support standards including 64/128bits WEP, WPA/WPA2 PSK (TKIP*, AES), 802.1x** ensures the best security and active defense against security treads. Lantech TWAP-5004 support up to 16 SSIDs, each SSID has its independent security and encryption.

Load Balancing** with 8 mechanisms for multi-WANs (premium license)

TWAP-5004 supports Load Balancing** for WAN connections.
There are eight schemes for Load Balancing** function:

Pack	Algorithm	Description
Standard	Fixed	Manually route by traffic type through fixed WAN link.
Basic Package	Failover	Routes connections through preferred WAN link while others stand-by. Sequentially activate another link if preferred link fail occurs. Once failover will not failback until link loss.
	Priority	Routes connections through preferred WAN link as primary while others follow by. Ex. Wi-Fi client>LTE>others
	Weighted Round-Robin	Evenly distribute the traffic over all working WAN links in circular order according to the specified weights.
	Custom Route	Routing through the selected WAN for each specific traffic, ex: TCP/UDP port number and IP address.
Full Package (incl. basic package)	Sticky Session*	Binding all connections in an application session to particular WAN link to ensure all connections in the session are routed to the same WAN link , that is suitable for security services like online payment etc.
	Smallest Load*	Routes connections through the WAN link with highest free bandwidth ratio. The ratio = 1 - (traffic load / the capability of a WAN link). The traffic load could be defined by downstream, upstream or total traffic
	Fastest*	Routes connections through the WAN link with lowest latency time.

Optional 2 port serial connection, Modbus / DNP3** gateway

It builds in optional 2 port serial connection for RS232; RS422/485 in which RS422/485 has 2.5KV isolation protection.
The built-in Modbus gateway can convert Modbus RTU/ASCII to Modbus TCP for device control.
It also can support optional DNP3** gateway over serial ports

Support various VPN applications and firewall

Besides traditional VPN peer to peer tunneling, TWAP-5004 support latest Multi-Site VPN function that is an efficient way for mesh tunneling. The registration is under cloud service and encrypted by SSH makes the connection easy and safe.
It supports Multi-Site VPN, Open VPN, L2TP, IPsec and PPTP** for various VPN applications.
The built-in Layer-4 firewall includes DoS**, IP address filter / Mac address filter* / TCP/UDP port number.

DIDO for alarm & email** notice; Event log; Remote Web control*

2 sets of DIDO function can support additional high/low physical contact for designate applications besides Port / Power events, for example, DIDO function can trigger alarm if the router was moved or stolen. In case of events, the TWAP-5004 will immediately send email** and trap.
The event log can be sent via syslog, emails or trigger the alarm relay.
When the router is at remote area with limited access, Web control* can help to get router status or remotely reboot by Web

Wide range dual isolated input voltage from 9V-60VDC (24V

model) or 16.8-137.5V (WV model)

The TWAP-5004 is able to work from dual 9VDC to 60VDC input voltage (24V model) or 16.8V ~137.5V DC isolated input (WV model) that is particular good for vehicle, rail train, depot etc. applications.

Environmental monitoring for inside router info& alerting; Graphic WI-FI signal strength and TX/RX rate display

The built-in environmental monitoring can detect router ambient temperature, voltage, current where can send the syslog, email** alert when abnormal.

Cloud/Host based InstaView**/InstaAir** software for router / fleet management and monitoring

Lantech InstaView** can offer fixed location router central management, configuration, and monitoring via secured Cloud or Host server. InstaAir** can offer fleet router management including remote configuration/upgrade, monitoring/alerting and report function

Optional external USB to micro SD** for storage backup or multimedia resources

The optional external USB to micro SD** can have configuration management, data backup or pre-store the multimedia resources for content application. User can designate the route

via load-balancing scheme to upload/download the data per request.

USB port for back up, restore configuration and upgrade firmware*

The built-in USB port can upload/download the configuration and upgrade firmware* through USB dongle for router replacement.

It supports dual-image firmware* to choose which one to start.

Editable login page of captive portal

The TWAP-5004 supports editable captive portal function that allows administrator to force end-users redirect to authentication page.

Ruggedized EN50155 design and FCC*/CE* & E-marking** certificate

The TWAP-5004 series is verified with EN50155*, EN61373*, EN45545 standard with IP65/54 housing. It passed serious tests under extensive Industrial EMI and environmental vibration and shocks standards. With E-marking** certificate, the TWAP-5004 is best for outdoor community, vehicle, power substation, process control automation etc. For more usage flexibilities, TWAP-5004 supports operating temperature from -20°C to 70°C or -40°C to 70°C(-E)
