### **OVERVIEW**

Lantech IWMR-3006 series is a next generation industrial multifunction VPN router w/up to 2x 802.11ac Wi-Fi + up to 2x LTE modem + 6x Gigabit Ethernet managed switch + 2 serial ports that supports advanced function of VPN, Load-Balancing(Basic & Full package), EMMC Flash Storage\*\*, Protocol gateway(Modbus), Wi-Fi roaming and LTE quad SIM fail-over for industrial applications. The dual core CPU with 1.6GHz + 256M flash enables the router to multi-task smoothly.

#### Dual concurrent LTE design 4G/3G for load-balancing

With dual LTE module design (2L model), 4 SIM card slots, IWMR-3006 can allow auto-swap, failover & failback between

multiple service providers for real non-stop connection. With concurrent LTE modules, it can also allocate bandwidth by "Load Balancing with 8 schemes between multiple WANs.

With one mobile LTE module (1L model), 2 SIM card slots, IWMR-3006 provides redundant link between two service providers.

Both GPS and Russian GLONASS systems are supported.

# Support AP/Bridge/Client mode, Mesh w/802.11k, v roaming

IWMR-3006 supports AP/Bridge/Client mode for different applications. Client mode supports PMK\*\* Caching and preauthentication.

It also supports 802.11k, v roaming to allow encryption keys to be stored on all of the APs in a network.

#### Built-in Wireless Mesh network (WMN)

IWMR-3006 supports Mesh network composed of different nodes. The set of SSIDs allow the wireless client to roam freely without the need for complicated account management. With Mesh protocol, it can provide a reliable, scalable, stable and seamless network topology.

#### Optional EMMC Flash storage\*\*

The optional EMMC flash storage on router can offer 8G/16G/32G capacity.

### IEEE 802.11ac dual band radio up to 2.6Gbps bandwidth

With IEEE 802.11ac capability, IWMR-3006 can operate either 5GHz or 2.4GHz bands, offering the maximum speed of 2.6Gbps bandwidth (1.3Gbps per 1AC). It is also compatible with 802.11g/n that can work with 2.4GHz for longer range transmission.

The Wi-Fi 11ac supports AP/BRIDGE/AP Client modes can be diverse for most of wireless application. Working with load-Balancing "Priority" mode, the AP client can enable router to transmit on Wi-Fi with first priority.

# Air-teaming\*\* for wireless high-sustainability and aggregated bandwidth

The innovative Air-teaming\*\* can combines multiple wireless links to achieve both high-sustainability and aggregated bandwidth. High sustainability can keep the network traffic alive even one link is down or severely interfered. Aggregated bandwidth can bind two link channels to provide the maximum throughput.

#### MIMO technology with 3T3R and SMA type connectors

Lantech IWMR-3006 series adapts MIMO technology with smart antenna transmission and reception for 3T3R. With six external detachable omni connectors and optional antennas, IWMR-3006 can have better Wi-Fi & LTE/GPS coverage.

#### Wireless WMM QoS

IWMR-3006 supports 802.11e standard which defines a set of Quality of Service for wireless LAN applications as well as WMM (WIFI multimedia)

#### Advanced security & 16 SSIDs

The security support standards including 64/128bits WEP, WPAWPA2 PSK (TKIP, AES), 802.1x ensures the best security and active defense against security treads. Lantech IWMR-3006 support up to 16 SSIDs, each SSID has its independent security and encryption.

# Load Balancing with 8 mechanisms for multi-WANs (premium license)

IWMR-3006 supports Load Balancing for LTE/WAN connections. There are eight schemes for Load Balancing function:

function:	Almonishus	December
Pack	Algorithm	Description
Basic Package	Fixed	Manually route by traffic type through fixed WAN link.
	Failover	Routes connections through preferred WAN link while others stand-by. Sequentially activate another link if preferred link fail occurs. Once failover will not failback until link loss.
	Priority	Routes connections through preferred WAN link as primary while others follow by. Ex. Wi-Fi client>LTE>others
	Weighted Round- Robin	Evenly distribute the traffic over all working WAN links in circular order according to the specified weights.
	Custom Route	Routing through the selected WAN for each specific traffic, ex: TCP/UDP port number and IP address.
Full Package** (incl. basic package)	Sticky Session*	Binding all connections in an application session to particular WAN link to ensure all connections in the session are routed to the same WAN link , that is suitable for security services like online payment etc.
	Smallest Load*	Routes connections through the WAN link with highest free bandwidth ratio. The ratio = 1 - (traffic load / the capability of a WAN link). The traffic load could be defined by downstream, upstream or total traffic
	Fastest*	Routes connections through the WAN link with lowest latency time.

#### 2 port serial connection, Modbus gateway

It builds in 2 port serial connection for RS232, RS422, RS485 in which RS422/RS485 has 2.5KV isolation protection.

The built-in Modbus gateway can convert Modbus RTU/ASCII to Modbus TCP for device control.

#### VPN and firewall

Besides traditional VPN peer to peer tunneling, IWMR-3006 support latest Multi-Site VPN function that is an efficient way for Mesh tunneling. The registration is under cloud service and encrypted by SSH makes the connection easy and safe.

It supports Multi-Site VPN, OpenVPN, L2TP over IPsec, IPsec, PPTP\*\*, L2 over GRE, IPGRE, and NAT for various VPN applications.

The built-in Layer-4 firewall includes DDoS, IP address filter / Mac address filter / TCP / UDP port number.

# DIDO for alarm & email notice; Event log; Remote Web control

2 sets of DIDO functions can support additional high/low physical contact for designate applications besides Port / Power events, for example, DIDO function can trigger alarm if the router was moved or stolen. In case of events, the IWMR-3006 will immediately send email and trap.

When the router is at remote area with limited access, Web control can help to get router status or remotely reboot.

# 24V/HV input voltage selection: dual 9V-56VDC (24V model) or single 90~305VAC/120~430VDC (HV model)

The IWMR-3006 is able to work from 9VDC to 56VDC (24V model) Or with single high power supply at 90~305VAC / 120~430VDC (HV model).

### Environmental monitoring for inside router info& alerting; Graphic WIFI & LTE signal strength

The built-in environmental monitoring can detect router ambient temperature, voltage, current where can send the syslog and email\*\* when abnormal

The graphic WIFI & LTE signal strength shows connection status at a glance

#### Ignition Sensing\*

Ignition sense allows you to delay power off the router with a designated time delay.

#### Built-in Managed Switch Function

Managed switch function is built-in and provides various L2+ functions for network access deployment. It delivers ports and PoE management, VLAN, QoS, multicast, redundant ring, and security functions.

# USB port for back up, restore configuration and upgrade firmware; Dual image firmware\*

The built-in USB port can upload/download the configuration through USB dongle for router replacement
